Tobia Marcucci

MIT CSAIL: 32 Vassar Street, Cambridge, MA 02139, USA

I am a PhD student at the Computer Science and Artificial Intelligence Laboratory (CSAIL) at MIT, working under the supervision of Russ Tedrake and Pablo Parrilo. Since November 2022 I am visiting Stanford University to collaborate with Stephen Boyd. My research sits at the intersection of convex and combinatorial optimization, with applications to robotics, motion planning, and control. Specifically, I study optimal decision making in circumstances where discrete and continuous choices have to be taken simultaneously. I work on these problems on a mathematical and numerical level: I design efficient problem formulations and fast solution algorithms.
