# **Tobia Marcucci**

MIT CSAIL: 32 Vassar Street, Cambridge, MA 02139, USA

I am a PhD student at the Computer Science and Artificial Intelligence Laboratory (CSAIL) at MIT, working under the supervision of Russ Tedrake and Pablo Parrilo. During my PhD, I have also spent one year at Stanford University as a graduate visiting researcher in Stephen Boyd's group. My research sits at the intersection of convex and combinatorial optimization, with applications to optimal control, robotics, and artificial intelligence. Specifically, I study optimal decision making in circumstances where discrete and continuous choices have to be made simultaneously. I work on these problems on a mathematical and numerical level: I design efficient problem formulations and fast solution algorithms.
